We invite you to participate in a research study being conducted by investigators from Washington University in St. Louis. The purpose of the study is to investigate how people learn and to identify ways to improve that learning.

You will also answer some questions about yourself (e.g., your gender, fluency with English, etc.). You are free to skip any questions that you prefer not to answer. It will take between 30 and 45 minutes to complete this study.

You will receive \$2 for your participation. You must be 18 years old to participate.

There are no risks or benefits to participation.

We will not collect your name or any identifying information about you.
